

Quick facts we would like you to know about Innovate Security & Automation for Life.

Innovate systems are no different from systems that are professionally installed other than they cost less.

The technical programming and all complex system configuration are completed before shipping our systems.

The systems are monitored for intrusion, life safety, and environmental hazards with purchase of the appropriate sensing equipment.

Innovate uses a standard twelve month agreement for client monitoring services.

Communication for alarm events uses the latest cellular technology.

Our systems are fully expandable, including video cameras & smart-home automation.

Innovate's equipment is engineered for easy DIY installation and is unlike any other equipment on the market.

Our systems cost less by removing technician installation labor from price.

We have engineered our mounting systems to be the easiest professional-grade systems to install in the industry.

Our systems have a lifetime warranty for intrusion sensors with continued monitoring.

Our systems are portable. If you move, we will send you new mounting equipment at no charge.

Every system is custom designed for the client free of charge.

Our monitoring centers are redundant in the event of natural disasters.

A single PC and Phone Application controls all components of our clients' systems.

Innovate is a new company founded by a professional custom integrator with decades of experience.

We use real people to provide customer service by phone, email or text messaging.

We use encrypted system devices whenever possible.

Our clients' video networks are locked down prior to shipping.

We expect to build relationships and provide our clients "security for life."
